### Description

- 400mm x 300m
- 17 micron thickness
- 6 rolls per pack
- Quantity discount available

## Stretch Wrap & Pallet Wrap

**Stretch wrap** (also known as pallet wrap and stretch film) is a strong plastic film that is easily stretched around items, especially items on a pallet. The elastic recovery of the wrap means that it keeps the items tightly bound and is perfect at keeping pallet items stable and to create unit loads.

**Pallet Wrap** is easily applied either by hand or with our hand-held dispenser; the wrap adheres to itself once it is wrapped around the pallet or around goods and protects the goods against dust and weather and will retain its tension whilst in transit.
